PROJECTS

Digital Agriculture System (graduation project)

- **Description:** A comprehensive digital ecosystem designed to support the agricultural sector through smart technologies that connect farmers, consumers, and delivery agents.
 - **Agricultural Guide App:** Provides crop information, market prices, agricultural instructions, and AI-powered consultations.

- **"Khudargy" E-commerce App:** Allows users to browse, evaluate, and purchase vegetables and fruits with detailed nutritional information.
 - **Delivery Agent App:** Enables logistics coordination for produce delivery
 - **Technologies:** Flutter
 - **Role:** Lead Developer
 - **Outcome:** Delivered a multi-app digital solution that boosts agricultural productivity, improves access to market data, and enhances food security through sustainable digital transformation.
-

Dairy Unit Management System

- **Description:** Comprehensive mobile system for managing milk collection and distribution for the Ministry of Agriculture, comprising three apps for various stakeholders.
 - **App 1:** Local associations register milk-producing families, track cow productivity, and record deliveries.
 - **App 2:** Associations manage collection from branches and transportation to factories.
 - **App 3:** Factory representatives record deliveries, conduct quality checks, and manage returns.
 - **Technologies:** Flutter
 - **Role:** Lead Developer
 - **Outcome:** Enhanced transparency and efficiency in milk collection and distribution processes.
-

Diesel Unit Management System

- **Description:** Mobile application for the Agricultural and Fisheries Investment Authority to manage national fuel inventory and distribution.
 - **Features:**
 - Data input on fuel supplies, station management, and project tracking.
 - Real-time inventory updates for administrators.
 - User permissions, instant audits, and notifications.
 - **Technologies:** Flutter
 - **Role:** Lead Developer
 - **Outcome:** Successfully deployed nationwide, improving management and monitoring of fuel distribution.
-

Blood Donation App – "رابطة الاهالي"

- **Description:** Application connecting blood donors with those in need, featuring a comprehensive donor directory and real-time notifications.
- **Features:**
 - Search by blood type.
 - Instant notifications and educational content.
 - User-friendly interface with dark/light mode.
- **Technologies:** Flutter
- **Role:** Lead Developer
- **Outcome:** Streamlined the blood donation process, facilitating quicker connections during emergencies.

Islamic App – "نكر"

- **Description:** Application providing a variety of Islamic resources, including Quran reading and daily prayers.
 - **Features:**
 - Offline functionality and clear Quran text.
 - Islamic supplications (Adhkar), Hadith collections, and accurate Qibla direction.
 - **Technologies:** Flutter
 - **Role:** Sole Developer
 - **Outcome:** Delivered a seamless, ad-free user experience for accessing Islamic content offline.
-
