PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of hands-on experience building, customizing, and publishing production mobile applications for Android and iOS. Strong experience in multi-vendor delivery, e-commerce, regulatory inspection, and field-operation systems. Skilled in Flutter/Dart, Bloc/Cubit, Riverpod, REST APIs, Clean Architecture, Firebase, CI/CD, performance profiling, and app-store releases. Proven ability to own mobile features end-to-end, work with real production APIs, and deliver maintainable applications used in operational environments.

PROFESSIONAL EXPERIENCE

Flutter Developer | Abaad Automation | Full-Time / On-site | Riyadh, Saudi Arabia | Apr 2026 - Present

- Lead Flutter development of the company's production mobile application, owning feature implementation, architecture decisions, debugging, and delivery.
- Develop Mazboot, a Regulatory Inspection & Compliance application with API-driven workflows for establishments, inspection sessions, sections/items, evaluations, evidence, and reporting.
- Build reliable mobile flows around field inspection operations, including state management, validation, performance optimization, and production-readiness for Android and iOS.

Flutter Developer | Al Dhabi Company | Part-Time / Remote | Sana'a, Yemen | Dec 2025 - Present

- Customized and extended a white-label multi-vendor platform across three production apps: Customer, Driver, and Vendor.
- Implemented branding/localization, pricing and order-flow changes, configuration modules, REST API integrations, and performance improvements.
- Supported Android and iOS production releases, including store submission and release-related fixes.

Flutter Developer | Now Company | Full-Time / On-site | Jeddah, Saudi Arabia | Aug 2025 - Feb 2026

- Customized and enhanced a white-label multi-vendor delivery platform across Customer, Driver, and Vendor applications.
- Adapted localized UI/UX and business workflows, adjusted pricing/order logic, and resolved performance bottlenecks affecting responsiveness and data handling.

Freelance Flutter Developer | Independent / Project-based | Remote | 2023 - Present

- Deliver Flutter applications for clients from requirements and UI implementation through API integration, state management, testing, release preparation, and post-delivery fixes.
- Built production solutions in e-commerce, field operations, donation, and content applications, with a focus on maintainability and practical business requirements.

Flutter Developer | Supreme Agricultural & Fisheries Committee | Full-Time / On-site | Sana'a, Yemen | Dec 2023 - Feb 2025

- Led development of four Flutter applications for dairy and fuel operations, covering field data entry, transfers, receiving, tracking, reporting, and secure access.
- Used Bloc, API integration, MVVM, secure local storage, and responsive interfaces for field users and operational workflows.

SELECTED PRODUCTION PROJECTS

Mazboot - Regulatory Inspection & Compliance | Flutter | REST APIs | Mobile Field Workflows

Production inspection application developed at Abaad Automation for structured regulatory audits and compliance workflows. Focused on reliable field execution, API integration, evaluation flows, evidence handling, and production readiness. Google Play | App Store

Top Media - E-commerce Platform | Flutter | Laravel | MySQL | Firebase | VPS

Built the solution end-to-end: Flutter customer app, Laravel backend, MySQL database, admin dashboard, REST APIs, Firebase notifications, and production deployment on a VPS. Google Play

Al Dhabi Multi-Vendor Platform | Flutter | Multi-vendor | Customer / Driver / Vendor

Customized and maintained a three-app delivery and e-commerce ecosystem with localized branding, order and pricing logic, configuration changes, API integrations, performance improvements, and store releases. Google Play | App Store

Dairy Unit Management System | Flutter | Bloc | APIs | Field Operations

Led development of three apps supporting milk collection and transfer workflows between collectors, associations, and delegates, with tracking, receiving/returns, reports, logs, and secure access.

Digital Agriculture System | Flutter | E-commerce | Agricultural Services

Graduation project combining an agricultural guide/advisor experience with an e-commerce application, including product browsing, cart/orders, user interactions, and agricultural information. Ranked among the Top 5 graduation projects in the faculty.

Thekr - Islamic Content App | Flutter | Offline-first | Local Storage

Published Android application for Quran, adhkar, Qiblah, bookmarks, and offline access, designed as an ad-free lightweight user experience. Google Play

Rabitat Al-Ahali - Blood Donation Platform | Flutter | User / Admin | Notifications

Mobile blood-donation solution connecting donors with recipients in urgent cases, with user-facing and administration workflows. Google Play

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, Responsive UI/UX, Flutter Flavors

State Management: Bloc, Cubit, Riverpod, GetX

Architecture: Clean Architecture, MVVM, SOLID Principles, Dependency Injection

Backend & Data: REST APIs, Dio, Firebase, Hive, SQLite, Shared Preferences, Secure Storage

Quality & Performance: Unit Testing, Automated Testing, Flutter DevTools, Performance Profiling, Debugging

DevOps & Release: Git, GitHub, GitHub Actions, Fastlane, CI/CD, Google Play Console, App Store Connect, TestFlight

EDUCATION

Bachelor of Information Technology (IT) - Al-Razi University, Sana'a, Yemen | 2025

Graduation project ranked among the Top 5 projects in the Faculty of Computer Science at Al-Razi University (2025).

CERTIFICATIONS & LANGUAGES

Certifications: Mobile App Development, UI/UX Design, Web Development Framework - Al-Razi University (2023)

Languages: Arabic: Native | English: TOEFL iBT (CCT, 2021)
